Steve,

Would you please attach a DMP to every SSSP, even if you are re-using one, so there is something there and we don't have to ask each time when someone wonders why it is missing?

Angie,

will you please check that each SSSP has an DMP before you send it around for signatures and if you find it is missing, ask START to attach it before we try to sign. We have been signing things twice too many times lately and I don't want OSCs to get any more frustrated with this process than they already are.

Kathy –

Jeff asked me about the DMP for Ashue Road. We previously completed one last fall for the initial response along with the SSSP (attached). As we were preparing the SSSP for this next phase, we decided that we could still use the original DMP and that there was no need to prepare a new one.

Let us know if this is sufficient. Or, should we re-submit the DMP with the new SSSP? Or add an explanation to the cover letter?

Thanks,
Steve
